Your Residential Community's Partner

OCWD serves as a care partner to your residential community (ALF/SNF). With OCWD as your diagnostic support partner, your patients will avoid waiting in line at a local lab or hospital for hours, just to be stuck in the arms by an unsympathetic technician, and your staff can spend their time on other critical care needs.

We save you time and resources. Having one of our mobile phlebotomy technicians scheduled to be on-site at your facility, means your staff do not have to spend time coordinating transport for your residents to a lab location, your residents avoid the unnecessary, time consuming, and potentially risking

trip to the lab, and the doctor receives the results exactly the same as if the patient had gone to the lab.

OCWD is a fast, affordable, professional resource for collection of any type of specimen that a doctor or other healthcare provider may use for diagnosis and treatment, from blood samples to stool specimens. We collect the specimens per the lab instructions, and then transport them to the laboratory designated by you, the patient insurance, or the practitioner.

OCWD is not a lab, and we do not conduct any testing. Because OCWD is an independent specimen collection support provider, your facility is free to source the most cost effective testing provider for your skilled nursing residents.

We are available on-demand, on a per draw, by appointment basis, or you can schedule to have our technician at your facility for half day or whole day sessions. Either way, using an OCWD mobile phlebotomist, your nursing team can focus on providing superior patient care, your facility saves time and resources, and your residents continue to get the diagnostic care they need.

OCWD Mobile Phlebotomy Services does not accept insurance for any of our services. However, insurance information will be collected at the time of service to submit with the specimen for lab testing. OCWD Mobile Phlebotomy Services is a private pay service. Specimen collection services are provided and billed by OCWD Mobile Phlebotomy Services. Laboratory testing is billed through your insurance.

Getting Lab Work Done Is Easy!

1. As a premier specimen collection service provider, OCWD is your one-stop shop for phlebotomy, and other specimen collection support.
2. We offer professional, personal, and state of the art specimen collection services to patients, healthcare providers and medical researchers.
3. We are experts in geriatric patients, and patients with special needs, including needle phobia, difficult veins, and anxiety. To achieve consistent quality care outcomes, your patient's are assigned a 'case worker' phlebotomist, who will see your patient each time an order is placed. The technician becomes familiar with the patient, and your patient becomes accustomed to the same phlebotomist.
